# DANGEROUS?

They report the weather and time, help with direction, and help keep our schedules organized. However, these same devices can utilize spyware and malware to provide unwanted persons access to our personal information and whereabouts. At the same time they keep us connected with friends and family, some argue mobile devices are actually creating a growing disconnect within society. Love them or hate them, mobile devices are here to stay.

Essential Question: **Are mobile devices dangerous?**

**Evaluation Criteria:**

- Completed essay is at least 4 paragraphs in length and comprises a least TWO research sources (10 points)
- A Distinctive and Established Claim is made (10 points)
- At least two paragraphs that fully apply CSQTQT (20 points)
- Voice, Hypotheses Development, Organization, and Bibliography (10 points)
